

# Blasting

7 Blasts: Dec 7-Jan 18

Last load of gravel:  
mid-March

40,000 cubic yards of  
ledge

2018 January 18

He [Mr. Russo]...said he didn't think the way it was handled was a mistake, but rather reflected that blasting was not as heavily scrutinized then as it is now.

# Lippitt Solar Award – 2019 Best Project

Chris Ichter, CS Energy, and Serdar Soytok, Captona

“[A]dapting the rugged 108-acre former dairy farm proved particularly challenging as original design drawings did not reflect actual conditions of the sloped, heavily backfilled site.”

The earthwork onsite is very minimal compared to a subdivision being on this site. There would be a lot more cutting and filling to get the land properly for a subdivision.
