Re: **Tasca Building Expansion – Utilities Submission**
1300 Pontiac Avenue Cranston, RI (Plat 13 Lot 76)
Account #814082, Service Stop #97982 (domestic)
Account #814083, Service Stop #97983 (Fire)

To Whom It May Concern:

In response to your request August 26, 2022 regarding water service at the above referenced location, please be advised that Providence Water currently owns and maintains a 16-inch AC (transite) water main running along Pontiac Avenue having a static pressure of approximately 70 psi. This location has an active 4-inch ductile iron domestic service (stop #97982) and an active 8-inch ductile iron fire service (stop #97983). Both water services are currently in service.

The Providence Water Engineering Department has reviewed the Utilities Submission for Tasca Building Expansion in Cranston. This proposed project will consist of an expansion of the existing building (approximately 2,565 S.F.) and a new building (approximately 9,200 S.F.). This project will require the existing general (domestic) water service to be extended internally. The project will also require a portion the existing underground fire service to be removed and relocated. All work performed to accommodate this project is after the Providence Water meters. This proposed on-site work to install and relocate water services is considered private and outside Providence Water's jurisdiction.

Should there be any questions or the need of additional information, please contact the Providence Water Engineering Department at (401) 521-6300 extension 7213 for assistance.

Respectfully,
PROVIDENCE WATER SUPPLY BOARD

Michael A. Di Nobile
Manager of Technical Services
