**Thuja (standishii x plicata) 'Green Giant' Growth Rate**

- Raulston reported 2 – 4ft of growth (height) per year at Raleigh, North Carolina  
Manual of Woody Landscape Plants  
- By Michael Dirr
- Reaches 25 – 30 ft tall by 8 – 10ft wide in 10 years  
- Monrovia Nursery
- Can grow 3 -4 ft per year in optimal conditions  
- NC State University Cooperative Extension

Based on the published data listed above, my personal observations of Thuja 'Green Giant' over the years & in conjunction with the growth already observed by Client, Anthony Longano, it is my professional opinion that with proper care the Thuja 'Green Giant' should continue to grow at a rate of roughly 2 – 3ft per year. This means if the trees are currently 6 – 7ft tall they should be roughly 8 – 10ft tall by the end of the next growing season (Autumn of 2021) & 10 – 13ft tall by the Autumn of 2022.
