CONSERVATION COMMISSION

Interoffice letter from the Conservation Commission

December 28, 2020

Hello Jason:

The Conservation Commission met on Tuesday Nov 24, 2020 06:30 PM. The agenda included the 'Natick Ave. Solar' project.

“Natick Avenue Solar” Preliminary Plan

Location: Natick Avenue, AP 22, Lots 108 & 119

Zoning District: A-80 (Single Family on 80,000 ft² Lots)

Owner: Ronald Rossi | Applicant: Revity Energy, LLC

Proposal: Applicant seeks to install a 6.25 MW AC ground-mounted solar energy system on 22.2 acres of a 64-acre site.

Without having the newest landscape plan in hand or digitally, the discussion led us to faithfully accept the new landscape plan as to meet all/any of Our discussion points.

This letter is to state that The Conservation Commission is pleased with the plans and the efforts that have been put forth for this project. The mixture of nature and the production of clean energy all seem to be upheld from Revity Energy.

Respectfully,
Carl A. Santucci
Chair
